Riyadh, Saudi Arabia

Senior Frontend & UX Engineer with **7+ years** of experience building scalable Angular applications and enterprise design systems for government and fintech platforms in **Saudi Arabia**. Specialized in usability optimization, performance enhancement, and scalable UI architecture.

TECHNICAL SKILLS

Proficient	HTML5, CSS3/SCSS, JavaScript, Angular 2+, TypeScript, Bootstrap, Tailwind, Storybook, Material UI, Git
Familiar	React JS, Redux
AI-Assisted Development	Cursor, ChatGPT – Applying AI-powered “vibe coding” workflows to accelerate feature delivery, automate refactoring, and enhance debugging.
Tools	Adobe Photoshop, Adobe XD, Illustrator, VS code
SD Model	Agile Methodology, Iterative Development, Scrum

EXPERIENCE

Masdr - مصدر

2025 – Present
Riyadh, KSA

Role: Senior IT Developer | Frontend & UX Engineering

I am working with the Masdr, in **Saudi Arabia**. I have extensive experience working with international teams.

Responsibilities:

- Mainly contributing to the **Mudad** platform mudad.com.sa — Saudi Arabia’s digital payroll and compliance system under the Ministry of Human Resources & Social Development—focusing on Angular frontend development.
- Developing, maintaining, and documenting the organization’s **Design system** in **Storybook**, ensuring reusable, scalable, and consistent Angular UI components.
- Spearheaded UI modernization initiatives including Angular upgrades and legacy component refactoring, improving maintainability and performance.
- Lead initiatives to improve product usability by collaborating with UX teams, analyzing user behavior, and refining interface flows to deliver a smoother and more intuitive experience.
- Leveraged **Cursor** and **ChatGPT** to accelerate development tasks, generate optimized code snippets, automate refactoring, and enhance documentation efficiency.

Royal Cyber

2021 – 2024
Riyadh, KSA

Role: Senior UI UX Engineer

Responsibilities:

- Developed scalable and maintainable Angular applications for **GOSI (General Organization for Social Insurance – KSA)**.
- Writing design system using storybook for developing reusable web components, followed atomic design pattern.
- Adding new features, functionality, and capabilities, integrating with backend APIs.
- Creating application wireframes and prototypes with enhanced UI features.
- Collaborate effectively with design, and platform teams to define specifications and deliver features iteratively.
- Performing bug fixes and code reviews to ensure code quality and performance.
- Create multi-language web applications to ensure globalization.

Avanza Solutions (Pvt.) Ltd

2020 – 2021

Role: UI UX Developer & Designer

Responsibilities:

- Creating application prototypes and doing UX research on similar application designs and user interface modules.
- Gather and evaluate user requirements in collaboration with product managers and engineers.
- Implement reusable React Components as per the design to integrate into product development.
- Identify and troubleshoot UX problems. Cross-browser compatibility issues and ways to work around them.

Intelligenes

2018 – 2019

Role: Senior UI UX Developer

Responsibilities:

- Developing and administering the new Angular, React-based web applications.
- Structuring our single-page applications to make them easy to maintain and to ensure they are highly modularized.
- Translated the design team's UX wireframes and mockups into responsive, interactive features, using HTML/CSS and JavaScript, AJAX.

Brandoes.com

2019 – 2022

Role: Technical Co-Founder

Responsibilities:

- Digitized retail operations into a fully functional eCommerce platform.
- Oversee social media accounts' design and implement marketing strategies to advertise our products to the audience.
- Manage budget for marketing, operations, and technology. Implement new features to develop brand awareness, like promotions, store branding, and giveaways.
- Collaborate and communicate with virtual team members, collect and analyze feedback to improve business.

PROJECTS

Mudad | URL: mudad.com.sa

Project Description:

Mudad is a digital platform to develop and facilitate administrative and financial procedures including paying, protecting, and processing employees' wages for the organizations. Mainly, my responsibility is to enhance the customer support modules by creating new features and interactive user interfaces.
